

## November 12th, 2007

Today we upgraded our demo of Download Tracker to 1.5. It isn't officially released yet but it is finishing testing. If you'd like to check it out [click here](#). You may need to force refresh (ctrl+F5) to clear any cache if you have visited the demo before. This marks a major release and we are proud of what we've accomplished so far. If you have any comments/concerns please post them in the forums...we'd love to hear your thoughts. Look for the official release a couple days from now.

Speaking of forums, today we also moved (finally) our forums from our one test domain to [checkndo.com](http://checkndo.com). You shouldn't notice any problems but if you do and you can still post the problem in the forums do that. If that doesn't work you can always send us an email [here](#).
